Updated: *March, 21, 2025*

Loyalty Program

1. General Provisions

Strifor provides an **18% annual interest rate** on the trading account balance for all **real trading accounts**, except for **Swap Free** and **Basic** accounts. Interest is accrued at a rate of **1.5% per month**.

2. Accrual Process

- Interest is calculated daily based on the client's **free margin** (excluding credit funds).
- The accrued amount accumulates throughout the month and is credited to the account as a separate **INTEREST RATE** transaction on the last day of each month.
- The balance used for interest calculations excludes **non-trading bonuses** (shown in the **credit** column in **MetaTrader 5**).
- Accounts with a zero or negative balance do not earn interest.

3. Conditions for Withdrawing Interest

To withdraw the accrued interest, the client must meet the following conditions:

- Execute **5 lots** of trading volume in forex/metals per **\$1,000 of free funds** on which interest was accrued during the billing month.
- If the required trading volume is not met, the accrued interest is deducted from the account.
- If a withdrawal is made in the billing month, the **accrued interest for that month will be canceled upon the next withdrawal**.

4. Additional Terms

- Clients may choose to **opt-out** of the loyalty program at any time if it conflicts with their personal, religious, or trading principles.
- Strifor reserves the right to **terminate or adjust** interest accrual under the program if the client violates the **Terms and Conditions of Services**.
- Strifor may **suspend or cancel the program** at its discretion without prior notice.
